

ISAAC BAKARI JUMA

Full-Stack Software Engineer

+254-705-493-891 | jumaisaq@gmail.com | linkedin.com/in/bakari-juma1 | github.com/BakariJuma1 | myportfoliobakari.netlify.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience building and deploying production-grade web applications in healthcare, e-commerce, and business domains. Ships end-to-end systems using React and Flask, including payment integrations with M-Pesa Daraja and Paystack handling real-world transactions. Strong in API development, frontend engineering, and Linux VPS deployment using Nginx and Unicorn. Works directly with clients on live systems with active users, including post-deployment maintenance and improvements.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL

Frontend: React, TailwindCSS, Responsive UI, Component Architecture, State Management

Backend: Flask, REST APIs, SQLAlchemy, JWT Authentication, MVC Architecture

Databases: PostgreSQL, SQLite

DevOps & Infra: Linux VPS, Nginx, Unicorn, Git, GitHub Actions, CI/CD, Render, Vercel

Integrations: M-Pesa Daraja API, Paystack

AI & LLMs: LLM-assisted development workflows, prompt engineering, AI debugging, integrating AI tools into development pipelines

WORK EXPERIENCE

Freelance Software Engineer - Barajubeats, Nairobi, Kenya · Apr 2026 – Present

React · Flask · PostgreSQL · M-Pesa Daraja · Paystack · Linux VPS · Nginx · Unicorn

- Designed and built a full-stack beat-selling platform generating revenue through digital product sales; sole developer from concept to production deployment.
- Integrated M-Pesa Daraja and Paystack for secure, real-time payment processing across multiple payment channels.
- Built a swipe-to-buy purchase flow that improved user conversion and simplified the checkout experience.
- Deployed and maintains the application on a Linux VPS using Nginx and Unicorn; monitors production logs and resolves live issues independently.
- Implemented automated email notifications and reminders, improving customer engagement and retention post-purchase.

Software Engineer - Phametime, Nairobi, Kenya · Sep 2025 – Present

React · Flask · PostgreSQL · TailwindCSS · M-Pesa Daraja · Paystack

- Designed and built a full-stack B2B marketplace platform from scratch that connects pharmaceutical sales reps to hospitals, clinics, departments, and solo doctors - enabling reps to discover and pay for verified access to healthcare touchpoints.
- Integrated M-Pesa Daraja and Paystack APIs for subscription and access-fee payments, supporting real-time transaction tracking across multiple payment channels.
- Built RESTful APIs powering rep onboarding, healthcare facility listings, matching logic, authentication, and workflow automation; manages production deployment and ongoing maintenance as sole developer.
- Provides continuous technical support for a live platform with active users - handling bug fixes, feature updates, and system monitoring post-launch.
- Led client onboarding and training for non-technical users; sole point of contact for ongoing technical support and system updates.

Freelance Software Engineer - Radam Jaribu Builders, Kakamega, Kenya · Sep 2025 – Nov 2025

React · Flask · radamjaribubuilders.com

- Designed, built, and deployed a production business website (radamjaribubuilders.com) as sole developer - React frontend, Flask backend, handed over to client on completion.
- Continues providing ongoing maintenance, updates, and technical support post-deployment.
- Also delivered IT support during the engagement: maintained 20+ devices, reduced downtime by 30%, resolved 90%+ of technical issues without escalation.

IT Support Intern - Nairobi City Water & Sewerage Co., Nairobi, Kenya · Jan 2022 – Apr 2022

- Automated routine system checks via scripting, reducing manual IT intervention time for the team.
- Resolved 50+ weekly technical issues while collaborating with developers on debugging workflows.

PROJECTS

SomaPoa - Bursary Management Platform · Mar – May 2025

React · Flask · PostgreSQL · JWT Auth | somapoa.netlify.app | github.com/BakariJuma1/SomaPoa

- Built a full-stack bursary application system enabling students to submit applications and administrators to review and manage them end-to-end.
- Implemented role-based access control (student vs admin) with JWT authentication and protected API routes.
- Designed relational database schema and REST API to manage application state, status tracking, and admin decisions.

PaySync - Debt Management Dashboard · Jan – Jul 2025

React · Flask · SQLAlchemy | paysync1.netlify.app | github.com/BakariJuma1/paysync-backend

- Created a financial dashboard enabling businesses to track customer debts, outstanding balances, and payment histories in one view.
- Built scalable backend APIs and reusable React components ensuring accurate financial calculations and clean reporting.

EDUCATION

Full-Stack Web Development - Moringa School, Nairobi, Kenya · Feb – Jul 2025

BSc Information Technology - Taita Taveta University, Voi, Kenya · Aug 2019 – Aug 2023
